

JERZY GRONAU

# **NAZEWNICTWO WSPÓŁCZESNYCH RYB**

CAŁEGO ŚWIATA

**Zawarte w tomach 1 – 9**

## **TOM 7**

Nazwy: W SIEDMIU JĘZYKACH  
WRAZ Z SYSTEMATYKĄ

UWZGLĘDNIA: NAUKOWE NAZWY ŁACIŃSKIE  
(Z synonimami)

oraz występujące odpowiedniki w językach:

POLSKIM  
ANGIELSKIM  
FRANCUSKIM  
NIEMIECKIM  
HISZPAŃSKIM  
ROSYJSKIM  
(w transkrypcji i cyrylicy)

Kraków, marzec 2008

(Odtworzenie - poprzez skanowanie - wydania 1-dno tomowego z grudnia 1996 !)

### Uwagi:

1. Pierwotne 1 tomowe wydanie z roku 1996 – było opracowane w systemie DOS w programie TAG 1,65 oraz dBASE 3p i zapisane na drukarce 9-cio igłowej. Stąd też i druk obecnego wydania nie jest najlepszy i posiada starą ręczną numerację stron.
2. Niniejsze 9- tomowe wydanie powstało ze skanowanego odtworzenia z matryc pierwszego jednotomowego wydania z roku 1996, (znajduje się w Bibliotece Jagiellońskiej) i podziale tegoż na 9 woluminów (tomów).
3. / Oryginalny zapis na dyskietkach 5,25 cala – przechowywany starannie – okazał się po 11 latach nieczytelny – nie do odtworzenia./
4. Wkładki z łacińskimi nazwami rodzin i kodem znajdują się dodatkowo w tomie 9., jak również dwustronnicowa systematyka ryb.
5. Należy pamiętać o komputerowym systemie sortowania. Nietypowe litery znajdują się na końcu sortowanego wykazu.
6. Nazewnictwo dotyczy tylko współczesnie żyjących ryb całego świata: żyjących w wodach słodkich, słonawych i słonych. Nazewnictwem objąłem: nazwy naukowe łacińskie lub zlatynizowane wraz z synonimami, oraz popularne nazwy (vernacularne) w siedmiu językach i tylko takie nazwy które potwierdzała przytoczona literatura.

J.G.
